2014 / 2015 Annual Report – Project Snapshot

Your Impact

Your support helps ensure that more lives in Cambodia can be protected and restored. We strive to break the chains of human trafficking and poverty through a combination of compassion, collaboration and perseverance.

HOPE FOR PREVENTION

To address the root causes of human trafficking **10,375 CAMBODIANS** were trained in issues of human trafficking, domestic violence and safe migration.

HOPE FOR RESTORATION

OVER 23 SURVIVORS of exploitation received services on their journey from brokenness to wholeness through trauma-informed care and encouragement.

HOPE FOR DIGNITY

OVER 600 CAMBODIANS received food, medical care and/or emotional support. Your generosity allowed us to walk alongside the poor, the ill, the prisoner and the vulnerable.

HOPE FOR THE FUTURE

To build up the next generation of Cambodians, **OVER 610 CHILDREN** were supported through educational resources and mentorship to be catalysts for change in their communities.

Highlights

Our new repatriation program helps fly victims of international human trafficking home to their families in Cambodia.

★ **REPATRIATION** – A growing number of young women are being trafficked outside of Cambodia, trapped in foreign countries with no means to escape. This year, we took on an exciting new program that is bringing trafficking victims home, transforming lives and creating change on international levels! We work collaboratively to support victims of human trafficking and provide legal assistance, counseling and safe passage back to Cambodia.

★ **PREY ROMEAS OUTREACH** – We completed construction of a community centre in Prey Romeas. The community centre is a collaborative initiative with a local church, equipping Cambodians to transform their community into a place of hope and safety through initiatives like a kids club, Bible study groups, a skills training school and more.

★ **WATER FILTRATION** – To support a displaced community suffering from health problems because they did not have access to clean water, we purchased a water filtration unit that would provide them with clean water for years to come.

★ **EMERGENCY ON THE BORDER** – Over 220,000 Cambodian migrant workers fled from Thailand in June 2014 as a result of government policy changes. Many left all their belongings behind in their mass arrival on the Cambodian border without access to food, water or transportation home. We funded the supply of water, food and sanitary kits for rapid distribution to the migrant workers.
